

ASSIGNMENT 2 OF 2 · TEAM DECLARATION · DUE FRIDAY 4 SEPTEMBER 2026, 23:59 SGT

A2 Team Declaration

ONE FILE PER TEAM. Fill this in together and CHECK IT INTO YOUR A2 SUBMISSION FOLDER — do not email it. Keep the file name TEAM_DECLARATION. A team that files nothing has an incomplete submission. Section 8 of the brief has the full rules.

1 · Team and problem

Team ID	Section	Problem chosen (A or B)
B-9	B	A

Your team is the group you were placed in at the start of the course — A-1 to A-9, B-1 to B-9, C-1 to C-10. Teams are not re-formed for A2.

2 · Members

#	Full name	Matriculation number
1	Jiang Dong	G2602205G
2	Liu Weiqi	G2606416G
3	Niu Duoer	G2606524B
4	Shi Zhiyun	G2609859G
5	Ubaidulla Asmitha	G2602440G
6	Xu Liangjuan	G2605068B

Every member, including anyone who has not yet engaged. Delete unused rows.

3 · Repository

Repository URL: <https://github.com/Lapis0x0/pe6201-claims-agent>

Public, and created by your team. The same URL goes in your final submission.

4 · Who owns what

Names against work. The strands below are the suggested split from the FAQ — replace them with your own if you have divided the work differently. Two rows are not optional: everyone writes evaluation cases, and everyone runs one live model. Three models is the floor; N-1 for a team of N is what we expect, with the remaining member taking the v1 pass. Name the model beside each person.

Strand	Feeds	Owner(s)
The loop and the tools	D1, D2(a), D2(c)	Shi Zhiyun + Ubaidulla Asmitha Shi: ReAct control loop, multi-action parsing, dependency rule and parallel-call execution. Asmitha: Problem A tool functions, shortest defensible tool set, gated action and tool-agent integration. Joint: integration, debugging and sequential-versus-parallel comparison.
Descriptors, v1 to v2 rewrite, guardrail layer	D0, D2(b), D3	Jiang Dong + Xu Liangjuan Jiang: D0 Why-an-Agent analysis, five good-run statements and 10-case guardrail checklist. Xu: six-field tool descriptors, v1→v2 rewrite/measurement and guardrail/interface design.
Evaluation harness and scripted run	D4, D5(a)	Niu Duoer Own the evaluation structure, answer key, grading rules, negative-case coordination, scripted backend run, instrumentation and result consolidation.
Cost model, ledger and sensitivity	D6	Liu Weiqi Own the three-layer cost model, measured token/cost ledger, four cost levers, monthly cost, sensitivity range and break-even analysis.
Evaluation cases — everyone, 5 to 8 each	D4	ALL MEMBERS Each member writes 5 - 8 evaluation cases, reviews another member's cases and validates expected outcomes.
Live model battery / v1 pass	D5(b), D2(b)	Shi - openai/gpt-4o-mini Jiang - google/gemini-2.5-flash Liu - deepseek/deepseek-v4-flash Niu - meta-llama/llama-3.1-8b-instruct Xu - qwen/qwen-2.5-7b-instruct Ubaidulla Asmitha - D2(b) v1 pass.
Two reproduced failures	D7	Shi Zhiyun + Xu Liangjuan Shi: reproduce and analyse Failure 1 (loop-control failure), including before/after turns, tokens, cost, pass rate and step-cap evidence. Xu: reproduce and analyse Failure 2 from the tool-interface or prompt layer and justify the fix.
Report and demo assembly	Report sections 1–6 + demo	Jiang - Section 1: Why an agent Shi - Section 2: Tool layer

		Niu — Section 3: Evidence/model results Liu — Section 4: Cost Xu — Section 5: Two failures Asmitha — Section 6: What we would not deploy Final assembly, consistency review and demo preparation are shared equally by all six members; everyone speaks in the demo.
--	--	--

5 · Contribution statement

THIS SECTION IS NOT OPTIONAL. Do not leave it blank.

State ONE of the following two things.

Tick one	Statement
✓	All members are contributing.
	There is a problem. It is described below, by name.

If you ticked the second box: name the member, what was agreed, and what has happened. Dates help.

--

Naming a problem here is not an accusation and it does not by itself cost anyone marks. It starts a conversation with a deadline attached: the instructor issues a written warning and the member has nine days to remediate, which usually resolves it. SILENCE AT THIS CHECKPOINT IS READ AS “all members are contributing” — a team that says nothing on 4 September and raises the same problem on 13 September has a much weaker case.

6 · Signed off by

Name: Ubaidulla Asmitha **Date:** 04/09/2026

One member submits on behalf of the team. Everyone should have read it first.
